

We have been married for 42 years. While my children were growing up, virtually every family dinner was interrupted by at least one phone call by a telemarketer. It was disruptive and annoying. Now, my husband and I both have arthritic knees. What a pleasure it has been since the do not call legislation not to have to get up and hobble to the phone only to be approached by unwanted callers. Please keep this legislation as a service to the voters of this state.
